

## Consent Form for Evolution 3 Bleaching

The Evolution 3 Bleaching procedure is a state of the art treatment designed to whiten the teeth to their optimum natural brightness.

**The amount of whitening varies from patient to patient and cannot be predicted exactly.** In general yellow or brown teeth, teeth with staining from tea, coffee or red wine, and darkened monochromatic teeth are easier to whiten.

Evolution 3 will significantly whiten all teeth as long as your dentist's instructions are followed closely

### Alternatives to tooth whitening:

If you would like whiter teeth there are several other options available

- Scale & Polish or Air Abrasion – will only remove surface staining
  - Veneers and Crowns – involve shaving of tooth enamel and replacing with porcelain, but can change the shape as well as the colour of the smile
- 1- **Transient tooth sensitivity may develop during treatment and your dentist may give you desensitising swabs**
  - 2- **Temporary inflammation or white spots on your gums may be caused by the whitening procedure. These can cause short lived discomfort which resolves within a few hours.**
  - 3- **Occasionally patchy white areas occur which equalize within 2 – 3 days.**
  - 4- **Porcelain restorations such as crowns or veneers as well as white fillings will not change colour and may need to be replaced after the whitening procedure.**
